

SF motion / product sheet

bridge: With riveting, adhesive and ring technology, any lens shape is possible and together with the unique click-on feature for nose pads, any model can be easily adjusted to any face.

temple/hinge: The thermoplastic temples can be modeled individually and thanks to the practical click-in technology, they do not need any more (metallic) connecting parts.

endpiece: The thermosensitive endpieces adjust to the shape of the head according to body temperature. Special materials and shapes provide for individually optimized support.

pad: The ergonomic pads in various sizes prevent pressure points, provide for safe support and optimally adjustable visual points without fatiguing the eyes.

color/décor: The possibility of combining color (color fastness thanks to compounding), finish and decor fulfill any desire.
